FOR IMMEDIATE RELEASE – February 22, 2021

The 2021 Components for Military & Space Electronics (CMSE) Conference to be Presented Virtually

- *The 24th annual CMSE conference will be held April 19 – 23, 2021*
- *All technical sessions will be presented in an online format*
- *Four tutorial sessions will be held preceding and following the conference program*

BETHLEHEM, PA (February 22, 2021) – The 24th annual [Components for Military & Space Electronics \(CMSE\)](#) Conference will be held virtually April 19–23, 2021, due to concerns over the global coronavirus (COVID-19) pandemic. CMSE is the industry’s premier forum designed to present best practices for component and project engineers, quality assurance, and supply chain personnel engaged in military and space electronic systems. The full conference program, which includes more than 35 technical presentations delivered by leading industry experts from around the world, as well as three keynote addresses and two focused panel discussions, will be presented in an online format.

“In spite of the challenges posed by the global coronavirus pandemic, we remain committed to delivering an effective, interactive, and economical virtual conference experience focused on the design, reliability, and application of electronic components for military and aerospace applications,” said Thomas Green, CMSE program chairman. “We believe that the virtual format for this year’s CMSE will provide maximum attendee participation and interaction, especially for younger component engineers pursuing opportunities for continued training and education.”

Registration for the CMSE 2021 is now open online at <https://store.tjgreenllc.com/product-category/cmse2021/>. The CMSE 2021 Advance Technical Program is also available on the conference website at <https://www.tjgreenllc.com/cmse/2021-advance-program/>.

For more information about CMSE, please visit <https://www.tjgreenllc.com/cmse/>, email info@tjgreenllc.com, and follow them on [Twitter](#) and [LinkedIn](#).

About CMSE/TJ Green Associates

The [Components for Military & Space Electronics](#) is the industry’s premier technical conference for presenting best practices for component engineers, project managers, quality assurance, and supply chain professionals focused on the design, reliability, and application of electronic components for military, avionics, aerospace, and commercial space systems.

[TJ Green Associates LLC](#) is a veteran-owned small business dedicated to providing leadership in teaching and consulting services for the assembly and packaging of microelectronic components used in high-reliability military, space, and medical device applications. Founder and principal Thomas J. Green, a 28-year USAF veteran, has more than 38 years combined experience in industry, academia, and Department of Defense positions developing teaching and consulting programs for microelectronics assembly-related materials and processes.
