

David Locker

David Locker has served as a components engineer supporting Army aviation and missile programs for over 30 years. He has participated in numerous efforts to develop, document, and implement best practices for assuring electronics reliability as a member of industry standards bodies and consortiums including Society of Automotive Engineers, International Electrotechnical Commission, IPC, JEDEC, iNEMI, Aerospace Vehicle Systems Institute, and Center for Advanced Vehicle and Extreme Environments Electronics. He also serves as lead for the Preparing Activity of MIL-STD-11991, General Standard for Parts, Materials, and Processes.
