

Mark Porter

Mark Porter is a Senior Technical Specialist at NASA JPL supporting all JPL Programs. He has a broad background across multiple part types as well as assembling and testing boards, boxes, and satellites. Mark also has a strong Electrical/Electronic Materials and Processes background and is a former SAE CE12 Chairman with over 30 years experience ensuring high reliability Space Flight Hardware both as a Prime Contractor and a Tier 2 Supplier. He is known for his ability to gather information and concerns across part suppliers, contractors, and customers and quickly summarizes the issues, drives towards solutions.
