FOR IMMEDIATE RELEASE – February 24, 2023

The 26th Annual Components for Military & Space Electronics (CMSE) Conference & Exhibition

- *The 2023 CMSE conference will be held April 25 – 27*
- *One full day of tutorials - April 25th*
- *Over 30 technical talks and two keynote discussions delivered by leading industry experts - April 26 & 27*

BETHLEHEM, PA (February 24, 2023) – The 26th annual [Components for Military & Space Electronics \(CMSE\)](#) Conference & Exhibition will be held in Los Angeles, California April 25–27, 2023. CMSE is the industry’s premier forum designed to present best practices for component and project engineers, quality assurance, and supply chain personnel engaged in military and space electronic systems. The full conference program, which includes more than 30 technical presentations delivered by leading industry experts from around the world, as well as two keynote addresses, will be presented at the Four Points by Sheraton (LAX).

“This year’s CMSE event will be live, our last live event was in 2019. CMSE was held virtually the past two years, but fortunately we’ll be back together and focused on delivering a high quality experience this year.” said Thomas Green, CMSE program chairman. “Component engineering is an underserved discipline in the field of military and space electronics. At this conference we discuss a diverse group of problems that face a component engineer.”

In addition to delivering a conference experience focused on high quality technical talks, keynotes and tutorials that foster maximum attendee participation, CMSE 2023 is inviting all students, PhD Candidates and young professionals (3 years since graduation) an opportunity to participate in CMSE at no charge to learn more about microelectronics and careers in the military and aerospace industry.

Registration for the CMSE 2023 is now open online at <https://www.tjgreenllc.com/cmse/#registration>. The CMSE 2023 Technical Program is also available on the conference website at <https://www.tjgreenllc.com/cmse/>.

About CMSE/TJ Green Associates

The [Components for Military & Space Electronics](#) is the premier event focused on the design, reliability, and application of electronic components for use in both terrestrial applications for avionics, aerospace, and military, as well as commercial, civilian, and military space systems.

[TJ Green Associates LLC](#) is a veteran-owned small business dedicated to providing leadership in teaching and consulting services for the assembly and packaging of microelectronic components used in high-reliability military, space, and medical device applications. Founder and principal Thomas J. Green, a 28-year USAF veteran, has more than 38 years combined experience in industry, academia, and Department of Defense positions developing teaching and consulting programs for microelectronics assembly-related materials and processes.
