

28th Annual Components for Military & Space Electronics Conference & Exhibition

April 29 - May 1, 2025

Four Points by Sheraton (LAX)
Los Angeles, California

Call for Presentations

The premier event focused on the design, reliability, and application of microelectronic components for use in both terrestrial applications for avionics, aerospace, and military, as well as commercial, civilian, and military space systems. Three days of technical talks and cutting edge tutorials taught by industry professionals.

We request presentation outlines at CMSE 2025 on topics such as:

- Integration of next gen 2.5/3D FOWL packaging into mil systems
- Non-Hermetics: Class P, Class Y, Class F and COTS for Hi Rel
- Leveraging automotive and alternate grade parts for military and space
- Selection and approval process for Space PEMS/COTS
- Hermetics: IGA (TM 1018) moisture issues, TM 1014 testing and getters
- EEE parts engineering issues for small satellites
- Advances in PME/BME MLCCs and MIL-PRF stacked caps
- Supercapacitors and high CV for high rel applications
- Integrated passive components, transient response issues
- Ultra-thin embedded passives to enable circuit miniaturization
- Tantalum polymer progression towards space and wear out
- GaN and SiC for RF and power management
- AI tools and digital engineering/model-based design
- Counterfeits, trust, and security issues in supply chain management
- Long term dormant storage (Hermetic vs. Non-Hermetic)
- Silicon PICs and fiber optics for space
- Thermal management at the component and board level

Presentations are 15 minutes with 5 minutes of Q & A. The CMSE committee does not require a formal paper submission. You decide how much of the presentation material to provide the attendee. The idea is to promote sharing of basic scientific and technical information about common problems faced by both the component manufacturer and the system OEMs in the Aerospace industry.

Please email your presentation outline to: info@tjgreenllc.com

Program Committee

Tom Green
General Chair

Tom Terlizzi
Exhibits Chair

Trevor Devaney
Hi-Rel Laboratories

Ron Demcko
Kyocera/AVX Corp.

Jon Rhan
Vishay

Aaron DerMarderosian
RTX: Collins Aerospace Mission Systems

Bob Lowry
Electronic Materials Consultant

Larry Harzstark
Aerospace

Andy Moor
Northrop Grumman Space Systems

Tomas Zednicek
EPCI European Passive Component Institute

Rick Rodriguez
Raytheon

Sultan Ali Lilani
Integra Technologies LLC

Peter Majewicz
NASA

Anthony Casasnovas
Honeywell Aerospace

Eric Higham
Microwave Journal

John Reardon
COTS Journal
