

Misha Pierre-Mike

Misha was born in Boston, MA. When he turned 6, he and his family moved to the Ronald Regan Missile Test Site which was located on Kwajalein, an Island in the south pacific where his father worked as an engineer on of the range's many radar sites. It was there where Misha developed his passion for engineering. He holds a Bachelor's of Science in Electronics Engineering and has worked in the capacitor field for 10 years in both engineering and sales. Misha is currently the Sales and Marketing Manager for Evans Capacitor Company, a hybrid capacitor manufacturer that provides power dense, hi-rel capacitors for mission critical applications.
