

Manuel Romero

Manuel Romero received his B.A.Sc. and M.A.Sc. degrees in Electrical Engineering both from the University of Toronto, Canada. He is currently part of Cree's Technical Sales team in which he supports customers with the implementation of Cree's GaN on Silicon Carbide technology across many RF end markets. Manuel has over 14 years of experience in the high-power RF industry. Prior to joining Cree, he worked for MACOM, NXP Semiconductors and Freescale Semiconductor, and across several high-power transistor technologies.
