

## **Daniel West**

BS Electrical Engineering Mercer University 2010

Previously held a secret clearance working on F15 flight avionic stability and weapons improvements programs, and afterwards joined the Army as an airborne infantryman and participated in combat operations of Ghazni & Kabul Afghanistan, leading teams in forward base operations, IED clearance, and other coalition objectives including broad training objectives.

After multiple medals and awards left the Army to join AVX as a field applications engineer in the connector division. After 2 years in the connector group, joined the AVX TSG department, which is contained within the AVX R&D group. In this role, Daniel is responsible for engineering support across N.A. on all AVX products. He regularly conducts training at end customer sites and has published numerous articles ranging from energy harvesting techniques for IoT modules to electrolytic performance characteristics.

He resides in Greenville SC with his wife and 2 children and is an amateur radio operator.
