

Engineering and Production Considerations for SIPs

Matt Bergeron

Integra Technologies

Matt.Bergeron@integra-tech.com

The presentation will explore the following key items:

1. The benefits of SIPs (system-in- package)
2. The challenges associated with SIPs
3. Key design engineering and manufacturing considerations when build a SIP
4. Key layout and fabrication considerations of substrates used in SIPs
5. Testing, Qualification and DPA considerations for SIPs
