

COTS Mission Success Improvement Workshop Results

Ryan Rairigh, Ph.D.
Lockheed Martin Space
ryan.p.rairigh@lmco.com

An overview of the work executed by the COTS Mission Success Improvement Workshop team in 2023 will be provided in this presentation. The MSIW team included members from FFR&DC, USG and the Space Industry and was focused on defining and developing practical guidance and tools to navigate through the complicated process of assessing the viability and use of COTS for space applications. The talk will summarize the products developed by the team and discuss our path forward.
